

**National Interagency Coordination Center
Incident Management Situation Report
Tuesday, August 28, 2018 – 0530 MT
National Preparedness Level 5**

National Fire Activity

Initial Attack Activity:	Light (95 fires)
New large incidents:	1
Large fires contained:	1
Uncontained large fires:**	44
Area Command teams committed:	0
NIMOs committed:	2
Type 1 IMTs committed:	14
Type 2 IMTs committed:	21

Nationally, there are 66 large fires being managed under a strategy other than full suppression.

**Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

Two hundred thirty-three soldiers from the 14th Brigade Engineer Battalion based out of Joint Base Lewis-McChord, Washington are deployed in support of the Mendocino Complex.

One hundred thirty-eight fireline management personnel from Australia and New Zealand are assigned to support large fires in the California and Northwest Areas.

One RC-26 aircraft with Distributed Real-Time Infrared (DRTI) capability and support personnel from the 141st Air Refueling Wing (Washington Air National Guard) has been deployed to Spokane, WA in support of wildland fire operations in the West.

Active Incident Resource Summary

New fires:	3
New large incidents:	0
Uncontained large fires:	15
Type 1 IMTs committed:	6
Type 2 IMTs committed:	8

Crescent Mountain, Okanogan/Wenatchee NF. IMT 1 (Wilkins). IMT 1 (Turman) mobilizing. IMT is also managing the McLeod and Holman incidents. Eighteen miles west of Winthrop, WA. Timber. Minimal fire behavior. Evacuations, road, area and trail closures in effect. Precipitation occurred over the fire area yesterday.

McLeod, Okanogan/Wenatchee NF. Eight miles north of Mazama, WA. Timber. Moderate fire behavior with isolated torching, spotting and creeping. Numerous residences threatened. Road, area and trail closures in effect.

Holman, Okanogan/Wenatchee NF. Nineteen miles northwest of Mazama, WA. Timber. Minimal fire behavior. Structures and communication infrastructure threatened. Road, area and trail closures in effect.

Terwilliger, Willamette NF. Transfer of command from IMT 2 (Sinclair) to IMT 2 (Connell) will occur on 8/30. Five miles southeast of Blue River, OR. Timber. Active fire behavior with flanking, isolated torching and backing. Numerous structures threatened. Road, area and trail closures in effect. Precipitation occurred over the fire area yesterday.

Cougar Creek, Okanogan/Wenatchee NF. IMT 1 (Livingston). IMT 2 (Lawson) mobilizing. IMT is also managing the Bannock Lakes incident. Twelve miles northwest of Ardenvoir, WA. Timber, medium logging slash and closed timber litter. No new information.

Bannock Lakes, Okanogan/Wenatchee NF. Fourteen miles southwest of Stehekin, WA. Timber and brush. Minimal fire behavior. Trail closures in effect. Precipitation occurred over the fire area yesterday.

Natchez, Rogue River-Siskiyou NF. IMT 2 (Gales). Fifteen miles southeast of Cave Junction, OR. Timber and chaparral. Moderate fire behavior with backing, torching and flanking. Numerous structures threatened. Evacuations, road, area and trail closures in effect.

Watson Creek, Fremont-Winema NF. IMT 2 (Sheldon). Thirteen miles west of Paisley, OR. Timber and brush. Moderate fire behavior with single tree torching, short-range spotting and backing. Numerous structures threatened. Road, area and trail closures in effect.

Ramsey Canyon, Medford Unit, DOF. ODF IMT 1 (Hessel). Twelve miles north of Eagle Point, OR. Timber, chaparral and short grass. Moderate fire behavior with backing, running and spotting. Numerous structures and energy infrastructure threatened. Road closures in effect.

Taylor Creek, Medford District, BLM. IMT 2 (Harrod). IMT is also managing the Klondike incident. Ten miles west of Grants Pass, OR. Timber and brush. Minimal fire behavior. Numerous structures threatened. Road, area and trail closures in effect. Precipitation occurred over the fire area yesterday.

Klondike, Rogue River-Siskiyou NF. IMT 1 (J. Kurth). IMT 1 (Dueitt) mobilizing. Nine miles northwest of Selma, OR. Timber and chaparral. Active fire behavior with wind-driven runs, group torching and long-range spotting. Numerous residences threatened. Road, area and trail closures in effect. Evacuations have been lifted. Precipitation occurred over the fire area yesterday.

Boyds, Northeast Region, Washington DNR. Transfer of command from IMT 2 (Rabe) back to the local unit will occur tomorrow. Three miles west of Kettle Falls, WA. Timber and brush. Minimal fire behavior. Numerous structures and communication infrastructure threatened. Precipitation occurred over the fire area yesterday.

Horns Mountain, Colville NF. Transfer of command from IMT 2 (Goff) back to the local unit will occur today. Nineteen miles north of Evans, WA. Timber and heavy logging slash. Moderate fire behavior with backing, isolated torching and smoldering. Area closures in effect.

Miriam, Okanogan/Wenatchee NF. Fifteen miles east of Packwood, WA. Timber and brush. Minimal fire behavior. Numerous structures threatened. Evacuations, road, area and trail closures in effect.

Miles, Umpqua NF. Five miles northeast of Trail, OR. Timber. No new information.

Columbus, Umpqua NF. Fifteen miles east of Tiller, OR. Timber. No new information.

Jennie's Peak 1039 RN, Central Oregon Rangeland Protection Association. Fourteen miles south of Fossil, OR. Timber, brush and tall grass. No new information.

Stubblefield 1008 RN, Oregon Private Lands. Started on private land seven miles west of Condon, OR. Timber, brush and short grass. No new information.

Lonerock 1057 RN, South Gilliam County Rural Fire Protection District. Eight miles southeast of Condon, OR. Timber, brush and short grass. No new information.

Predictive Services Discussion: Temperatures will begin to trend toward average, as the upper level trough over the West begins to weaken. Breezy winds and low humidities will be present across north central Montana, southern Wyoming, and northern Utah. Convection will be mostly isolated and dry, limited mainly to southwestern Oregon, northern California, southwestern Montana, and east central Idaho. The monsoon across the Southwest will continue to be suppressed, with most of the activity limited to mainly New Mexico and eastern Colorado. To the east, a weak but active disturbance will move into the Great Plains from the Rockies, bringing scattered wet storms to the central and northern Great Plains. Wetting rainfall will be possible across the Great Lakes Region as a frontal boundary hangs up along the Canadian Border. A breezy westerly flow, along with scattered showers and storms, is expected from Ohio and Pennsylvania north. In the South, high pressure will continue to dominate. Hot and humid conditions are expected. Isolated storms will be possible in the Smoky Mountains.

Hazard Trees – Situational Awareness

Felling Safety Category

Snags are dead, standing trees without leaves or needles in the crowns and present a significant threat to forest worker safety. Snags may burn through more quickly than green trees and can fall without warning.

Live structurally compromised green trees weakened by insects, disease, weather, fire, and age can also fall without notice.

- Sawyers and crews operate with increased risk from hazard trees during low visibility or night operations. Night saw operations should include discussions involving minimizing falling operations due to reduced visibility and the reduction of situational awareness of immediate surroundings.
- Environmental conditions that increase risk from hazard trees:
 - Strong or gusty winds from storm cells
 - Air operations - water or retardant drops, rotor wash from helicopters
 - Steep slopes with rolling material
 - Diseased or bug-killed areas (Mountain Pine Beetle)
 - Fire weakened timber
 - Reduced visibility from smoke, fog or darkness
- Things to consider when assessing the potential danger of hazard trees in an area:
 - Timbered areas that have been burning for an extended period
 - High-risk tree species (those that are known for rot and shallow root systems) in the area
 - Numerous downed trees or tree parts in the area
 - Broken tops and dead limbs overhead or an accumulation of downed limbs around tree boles (stems)
 - Signs of tree decay including: cavities, splits, cracks, lack of needles, mechanical damage, missing bark, insect infestation, mushrooms or fungus growing from tree
 - Root damage from equipment, fire or erosion
 - Steep slopes for rolling debris, reduced personnel mobility and more difficult size-up
 - Weather forecast with high winds or wind impacting the tree canopy

Continued next page...

- Identify mitigation measures to reduce risk from hazard trees:
 - Identify, communicate, establish and monitor No-Work-Zones (NWZ) in all high-risk areas until the hazard has been mitigated
 - Assign qualified sawyers and Falling Bosses based on the complexity of the hazard
 - Consider ordering in higher complexity fallers in advance
 - Use heavy equipment or explosives to avoid placing sawyers under hazards
 - Plan quick and safe escape routes
 - Minimize exposure time at the stump by employing efficient felling procedures
 - Minimize impacts to the hazard tree from wedge pounding or other felling operations in the area
 - Do not turn your back on a falling tree or known hazard
 - Use lookouts to maintain secure felling areas
 - Discuss/practice medical evacuation procedures and accept risk accordingly
